## Jewels Make Permanent Gifts

### But You Must Buy Wisely

The old saying, "all that glitters is not gold," certainly applies to jewelry, for unfortunately, there has been more misrepresentations made to jewelry buyers than perhaps in any other line.

For particularly this reason, you should go to a jewelry house of REPUTATION, where you can depend upon any statement made, whether it be regarding diamonds, or jewelry.

The word RELIABILITY has always been connected with our business. It has always been our sacred desire to uphold our reputation as being one of the most reliable jewelers. Our display will appeal to the most fastidious.

## The Water In Which We Do Your Washing

No detail in the washing of clothes is so important as the water used.

Laundresses once imagined that they were exceptionally sanitary when they changed the water in tubs and boilers four or five times during a washday. And considering their limited facilities, they really did do well.

But if you were to visit the **Acme Laundry Man's** modern plant you will find us doing even better. We use new water, not once, but from nine to twelve times while your clothes are being cleansed.

Every few minutes while the washing is in progress, we draw off the muddled water and add more that is fresh and pure—water specially filtered and specially softened.

Isn't this an immense improvement over the home laundering methods of by-gone days? And it is a fine guarantee, too, of true clothes health.
